

**CLAIMS**

What is claimed is:

1. A method of making soap impregnated fabric comprising:  
cutting a section of fabric to a desired shape and size,  
5 heating a normally solid soap to a temperature above the melting  
temperature of said soap, wherein said soap substantially becomes a liquid,  
soaking said section of fabric in said liquid until said section of  
fabric becomes substantially saturated with said soap,  
removing said fabric from said soap, and  
10 solidifying said soap saturated fabric.
2. The method of making soap impregnated fabric according to claim  
1, wherein after said solidifying step, said soap impregnated fabric is substantially rigid.
- 15 3. The method of making soap impregnated fabric according to claim  
1, wherein after said solidifying step, said soap impregnated fabric is substantially flat.
4. The method of making soap impregnated fabric according to claim  
1, wherein said fabric is a washcloth.  
20
5. The method of making soap impregnated fabric according to claim  
1, wherein said fabric comprises cotton.
6. The method of making soap impregnated fabric according to claim  
25 1, wherein cutting a section of fabric to a desired shape and size comprises cutting a  
section of fabric into a substantially rectangular shape.

7. The method of making soap impregnated fabric according to claim 1, wherein after said solidifying step, said soap impregnated fabric has a thickness between approximately 3mm and approximately 5mm.

5

8. The method of making soap impregnated fabric according to claim 1, further comprising adding scented oil to said liquid soap prior to said soaking step.

9. The method of making soap impregnated fabric according to claim 1, further comprising adding coloring to said liquid soap prior to said soaking step.

10. The method of making soap impregnated fabric according to claim 1, wherein said normally solid soap is glycerin based.

11. A soap impregnated fabric made from the process comprising the steps:

cutting a section of fabric to a desired shape and size,  
heating a normally solid soap to a temperature above the melting temperature of said soap, wherein said soap becomes a liquid,  
soaking said section of fabric in said liquid soap until said section of cloth becomes substantially saturated with said soap,  
removing said fabric from said soap, and  
solidifying said soap saturated fabric.

12. The soap impregnated fabric according to claim 10, wherein after said drying and cooling step, said soap impregnated fabric is substantially rigid.

13. The soap impregnated fabric according to claim 10, wherein after said drying and cooling step, said soap impregnated fabric is substantially flat.

14. The soap impregnated fabric according to claim 11, wherein said fabric is a washcloth.

5

15. The soap impregnated fabric according to claim 11, wherein said fabric comprises cotton.

16. The soap impregnated fabric according to claim 11, wherein cutting a section of fabric to a desired shape and size comprises cutting a section of fabric into a substantially rectangular shape.

17. The soap impregnated fabric according to claim 11, wherein after said solidifying step, said soap impregnated fabric has a thickness between approximately 3mm and approximately 5mm.

20

18. The soap impregnated fabric according to claim 11, wherein the process further comprise the step of adding scented oil to said liquid soap prior to said soaking step.

19. The soap impregnated fabric according to claim 11, wherein the process further comprising adding coloring to said liquid soap prior to said soaking step.

20. The soap impregnated fabric according to claim 11, wherein said normally solid soap is glycerin based.

25

21. A reusable soap impregnated washcloth comprising:  
a section of fabric saturated by a normally solid soap while said normally solid soap is in a liquid state.

22. The reusable soap impregnated washcloth according to claim 21, wherein coloring has been added to said soap while in a liquid state.

5           23. The reusable soap impregnated washcloth according to claim 21, wherein scented oil has been added to said soap while in a liquid state.

24. The reusable soap impregnated washcloth according to claim 21, wherein said soap is glycerin based.

10

25. The reusable soap impregnated washcloth according to claim 21, wherein said washcloth is impregnated with sufficient soap for between approximately two and approximately five uses.

15
